

## Remote Firmware Update-AXM-WEB-PUSH

The AXM-WEB-PUSH supports remote firmware update. The WEB module can check to see if the module is running the latest firmware. If not the user can update the firmware of the AXM-WEB-PUSH remotely independently.

- Enter the IP address of the AXM-WEB-PUSH and login with Admin access level.
- Once logged in, click on 'Settings' and select "Firmware".
- From the Firmware page, click on 'Check' under the "Remote Update".
