

# Inline Watertight Fuse Holders

## AK Series

The AK series 600 Vac/Vdc in-line fuse holders are a series of watertight fuse holders that provide maximum protection for high humidity and corrosive environments. The in-line fuse holders are designed to be safe to the touch and flexible for use in different types of applications.

### Features/Benefits

- Designed to increase safety by eliminating shock risk, by making it easier to disconnect individual devices for servicing
- Increased efficiency by preventing faulted ballast from severely damaging the fixture or device
- IP67 touch-safe standards
- Watertight O-ring seal
- Different terminations are available for design flexibility
- Insulating boots are available for harsh environments
